2016 – 2017 | 68%

PROJECTS

MarketHub : Online Shopping Destination

"MarketHub" is an e-commerce project powered by React.js, offering dynamic user interfaces for seamless online shopping. With features like real-time search, secure payment processing, and personalized recommendations, it delivers a modern shopping experience. Leveraging React's component-based architecture, it ensures fast performance and scalability across devices, showcasing expertise in React.js development and front-end design.

Spotify-Clone : A Music Streaming Application Replica

Developed a Spotify clone project using HTML and CSS, without incorporating responsive design. This project focused on accurately replicating Spotify's visual layout and features, providing hands-on experience in front-end development and design implementation.

Personal Portfolio Website

Developed a fully responsive personal portfolio website using **React**. Showcases skills, projects, and professional experience as a frontend developer. Features a clean, modern UI/UX design optimized for desktop and mobile devices. Includes sections for resume, project portfolio, technical skills, and contact information. Implemented interactive features using React components and state management.

Online Food Delivery Website

Developed a responsive online food delivery website using React, featuring a user-friendly interface for browsing menus, placing orders, and tracking deliveries. Integrated RESTful APIs for real-time updates and utilized Redux for effective state management. Optimized performance through lazy loading and code splitting.
